Remarks	AGQG is used to realise the AVWS datum. Uncertainties (4-8 cm across mainland Australia) are given in the accompanying grid file AGQG_uncertainty_20191107.gsb. This version of the AGQG model contains a systematic bias of ~0.91 m due to an error in information from suppliers of the global model used in its creation. This AGQG model has been replaced with version GAv2 called AGQG_20201120.
