<i>Remarks</i>	The ETRF2000 reference frame is a realization of the ETRS89 reference system. The EUREF Technical Working Group (TWG) recommends to adopt ETRF2000 as the conventional frame of the ETRS89 system.	
<i>Anchor definition</i>	Coincides with ITRF2000 in orientation and scale at epoch 1989.0 realigned to ITRF89 at epoch 1989.0 using 3 translations and is fixed to the stable part of the Eurasian tectonic plate through 3 rotation rates derived from the ITRF2000 velocity field, representing the Eurasian plate's angular velocity about its Euler pole.	
<i>Coordinate Reference Epoch</i>	1989.0
