<i>Remarks</i>	Normal orthometric heights. Replaced by Local Tidal at Pago Pago (item 740).	
<i>Anchor definition</i>	American Samoa Vertical Datum of 2002 (ASVD02) consists of a leveling network on the island of Tutuila (in the territory of American Samoa) referenced to mean sea level at the tide gauge Pago Pago Harbor. ASVD02 was affirmed as the official vertical datum in the National Spatial Reference System for the island of Tutuila in American Samoa, replacing all previous height systems for this region. The official defining document for that datum was published in 2009.
