<i>Remarks</i>	An update to IGS14. Replaces IGS14. Used by IGS products from 2020-05-17. An updated set of satellite and ground antenna calibrations, igs14.atx, should be used together with IGb14, as well as post-seismic deformation models psd_IGb14.snx. IGb14 is aligned indirectly with ITRF2014 via IGS14.	
<i>Anchor definition</i>	IGb14 was obtained from a long-term stacking of daily IGS solutions of GPS weeks 730 to 2092. IGb14 is aligned in origin, scale and orientation to IGS14 via a subset of 233 stable, well-performing IGS stations.
