<i>Remarks</i>	Grid transformation from ITRF2008 ellipsoidal heights to CGVD2013(CG2013) orthometric heights using the CG2013 geoid model upon which CGVD2013(CG2013) is defined. Bi-linear interpolation of the grid file will give results agreeing to within 1cm 99.97% of the time.	
<i>Operation version</i>	v1	
<i>Scope</i>	Spatial referencing	
<i>Operation accuracy</i>	0.03 m	
<i>Source CRS</i>	ITRF2008 - LatLonEHt	
<i>Target CRS</i>	CGVD2013(CG2013) - OHt	
<i>Operation method</i>	Geographic3D to Gravity Related Height (Canada)

<i>Remarks</i>	For consistency with earlier geoid models in Canada, reference software for CGG2013 and CGG2013a uses bi-quadratic interpolation over nine grid nodes. The bi-linear interpolation is sufficient for most uses as the newer models have a higher spatial resolution. See information source for file format documentation.
