<i>Remarks</i>	Replaces ITRF93. Replaced by ITRF96. This is a purely Cartesian reference frame with no ellipsoid defined. GRS80 is the ellipsoid recommended by the IAG and IERS.	
<i>Anchor definition</i>	Realisation of the IERS Terrestrial Reference System (ITRS) at reference epoch 1993.0. Origin is defined by a weighted average of a selection of SLR and GPS solutions. Scale is defined by a weighted average of a selection of VLBI, SLR and GPS solutions, modified in order to take into account the fact that the solutions use TAI and not TCG as a time scale. Orientation is consistent with ITRF92 (not ITRF93) at epoch 1988.0 and its time evolution follows the geophysical model NNR-NUVEL1A. Datum defined by a set of 3 dimensional Cartesian station coordinates and velocities given in the citations.
