<i>Remarks</i>	Replaces SIR14P01. Replaced by SIR17P01.	
<i>Anchor definition</i>	Realized by a frame of 303 continuously operating stations using GPS and GLONASS observations from March 2010 to April 2015 and aligned to IGB08 at epoch 2013.0. Weekly normal equations from March 2010 to April 2011 were reprocessed using the second reprocessing campaign products (IG2) of the International GNSS Service and absolute phase centre calibrations referring to the IGS08 reference frame. Velocity model VEMOS2015 used to propagate coordinates from an arbitrary epoch to the 2013.0 reference epoch.
