<i>Remarks</i>	Replaced AGD66 in Australia except in the States of New South Wales and Tasmania and the Australian Capital Territory and the Northern Territory.	
<i>Anchor definition</i>	Defined through coordinates and observations used to derive the previous AGD66 coordinates with the addition of point-position and multi-station Doppler, SLR and VLBI observations. The final coordinates were obtained from a single national least squares adjustment of all observations holding the coordinate of the Johnston Origin fixed.
