<i>Remarks</i>	The China Geodetic Coordinate System 2000 (CGCS 2000) is a geocentric terrestrial reference system compatible with the International Terrestrial Reference System. CGCS 2000 is the standard Chinese geodetic reference system for geospatial information. It was originally realized by a combined adjustment of astro-geodetic observations as used for Xian 1980 and a GPS control network observed 2000-2003. It is presently realized and maintained by a network of 360 national CORS stations and 4508 GNSS geodetic control points. Adopted July 2008 by China. Replaces Xian 1980 horizontal datum.
<i>Anchor definition</i>	The China Geodetic Coordinate System 2000 is presently defined and maintained by 360 national CORS stations and 4508 GNSS geodetic control points that are aligned with ITRF97 at epoch 2000.0. There are zero translations, rotations, and scale change with respect to ITRF97 at epoch 2000.0.
<i>Release date</i>	2008-07-01
<i>Coordinate Reference Epoch</i>	2000.0
<i>Scope</i>	Spatial referencing
<i>Ellipsoid</i>	CGCS 2000
