

# ISO Geodetic Registry

<i>Item class</i>	OperationParameter	
<i>Name</i>	<b>False northing</b>	
<i>Item status</i>	VALID	
<i>Identifier</i>	829	
<i>Information source</i>	<i>Title</i>	Geomatics Guidance Note No 7, part 2: Coordinate Conversions and Transformations including Formulas
	<i>Author</i>	International Association of Oil and Gas Producers (IOGP)
	<i>Publisher</i>	International Association of Oil and Gas Producers (IOGP)
	<i>Revision date</i>	2021-11
	<i>Edition</i>	61
	<i>Series/Journal name</i>	IOGP Publication
	<i>Issue identification</i>	373-7-2
	<i>Other citation details</i>	<a href="https://epsg.org/guidance-notes.html">https://epsg.org/guidance-notes.html</a> (accessed 2022-01-19)
	<i>Title</i>	The Universal Grids and the Transverse Mercator and Polar Stereographic Map Projections
	<i>Author</i>	National Geospatial-Intelligence Agency (NGA)
<i>Information source</i>	<i>Publisher</i>	National Geospatial-Intelligence Agency (NGA)
	<i>Revision date</i>	2014-03-25
	<i>Series/Journal name</i>	National Geospatial-Intelligence Agency Standardization Document
	<i>Issue identification</i>	NGA.SIG.0012_2.0.0_UTMUPS Version 2.0.0
	<i>Other citation details</i>	<a href="https://nsgreg.nga.mil/doc/view?i=4056&amp;month=3&amp;day=28&amp;year=2022">https://nsgreg.nga.mil/doc/view?i=4056&amp;month=3&amp;day=28&amp;year=2022</a> (accessed 2022-04-20)
	<i>Title</i>	Map Projections – A Working Manual
	<i>Author</i>	J.P. Snyder
<i>Information source</i>	<i>Publisher</i>	United States Government Printing Office, Washington, D.C.
	<i>Publication date</i>	1987
	<i>Series/Journal name</i>	U.S. Geological Survey Professional Paper
	<i>Issue identification</i>	1395
	<i>Other citation details</i>	<a href="https://doi.org/10.3133/pp1395">https://doi.org/10.3133/pp1395</a> (accessed 2022-01-19)
	<i>Title</i>	Map Projections – A Working Manual
<i>Data source</i>	ISO Geodetic Registry	
<i>Remarks</i>	<p>EPSG DEFINITION Since the natural origin may be at or near the centre of the projection and under normal coordinate circumstances would thus give rise to negative coordinates over parts of the mapped area, this origin is usually given false coordinates which are large enough to avoid this inconvenience. The False Northing, FN, is the value assigned to the ordinate (north or south) axis of the projection grid at the natural origin. SIMPLIFIED DEFINITION Constant value that is added to the northing coordinates of a projected coordinate system to avoid negative values.</p>
