<i>Remarks</i>	KSA-GRF17 replaces all previous geodetic datums including Ain el Abd, MOMRA Terrestrial Reference Frame 2000 and GDMS.	
<i>Anchor definition</i>	Aligned with ITRF2014 at epoch 2017.0 using 51 IGS primary stations and 16 additional IGS stations within 2500 km of Riyadh, and fixed to (co-moving with) the stable part of the Arabian tectonic plate as defined by 3 rotation rate parameters estimated from 41 IGS and GASGI GNSS stations. The reference frame is realized by 333 GNSS stations in Saudi Arabia.
