<i>Anchor definition</i>	North American Vertical Datum of 1988 (NAVD 88) consists of a leveling network on the North American Continent, ranging from Alaska, through Canada, across the United States, referenced to water levels at tide stations at Pointe-au-Pere (1970-1983) and Rimouski (1984-1988) in Canada. The station at Pointe-au-Pere was transferred to Rimouski in 1984. The station at Rimouski is the only one remaining as a reference for NAVD88.
