## ISO Geodetic Registry

Item class OperationParameter

Name Scale factor at natural origin

Item statusVALIDIdentifier832

Alias Scale on central meridian REMARK: Used by citation CI2

Information source Title Map Projections – A Working Manual

Author J.P. Snyder

Publisher United States Government Printing Office,

Washington, D.C.

Publication date 1987

Series/Journal name U.S. Geological Survey Professional Paper

Issue identification 1395

Other citation details https://doi.org/10.3133/pp1395 (accessed

2022-01-19)

Information source Title Geomatics Guidance Note No 7, part 2:

Coordinate Conversions and Transformations

including Formulas

Author International Association of Oil and Gas

Producers (IOGP)

Publisher International Association of Oil and Gas

Producers (IOGP)

Revision date 2021-11 Edition 61

Series/Journal name IOGP Publication

Issue identification 373-7-2

Other citation details https://epsg.org/guidance-notes.html (accessed

2022-01-19)

Information source Title The Universal Grids and the Transverse Mercator

and Polar Stereographic Map Projections

Author National Geospatial-Intelligence Agency (NGA)
Publisher National Geospatial-Intelligence Agency (NGA)

Revision date 2014-03-25

Series/Journal name National Geospatial-Intelligence Agency

Standardization Document

Issue identification NGA.SIG.0012\_2.0.0\_UTMUPS Version 2.0.0

Other citation details https://nsgreg.nga.mil/doc/view?

i=4056&month=3&day=28&year=2022 (accessed

Remarks EPSG DEFINITION The factor by which the map grid is reduced

or enlarged during the projection process, defined by its value at the natural origin. SIMPLIFIED DEFINITION The factor by which a projected coordinate system is reduced or enlarged (scaled) at its origin. ADDTIONAL REMARK "Scale on central meridian" name from

Snyder (1987) used as alias.
