Remarks Adopted by the Canadian federal government for use in Canada.

Replaces NAD83(Original). Replaced by NAD83(CSRS) v2.

Anchor definition Realization of the North American Datum of 1983 and the first

version of the Canadian Spatial Reference System, referred to as CSRS96. The frame is defined by a seven parameter transformation of ITRF92 3D geocentric Cartesian coordinates for Canadian stations at reference epoch 1988.0. This solution is assotiated with only a diagonal covariance matrix for the defining coordinates. The origin, scale and orientation of the frame are nominally defined to be that for the BIH

Terrestrial System 1984 (BTS84).
