Remarks Normal orthometric heights.

Anchor definition Northern Marianas Vertical Datum of 2003 (NMVD03) consists of a set

of three independent leveling networks on the islands of Rota, Saipan and Tinian (in the Commonwealth of the Northern Mariana Islands). Each of these leveling networks is affixed to a single origin point on their respective islands referenced to the Saipan tide station. Island of Rota: Tide Station Rota East Harbor, Rota (PID: DG4014, VM: None, Bench Mark: Tidal 3, 1.482 m above LMSL). Island of Saipan: Tide Station 1633227, Tanapag Harbor, Saipan (PID: DG3988, VM: 16316, Bench Mark: 163 3227 TIDAL UH-2C, 1.657 m above LMSL). Island of Tinian: Tide Station Tinian Harbor, Tinian (PID: AA4407, VM: None, Bench Mark: Tidal 1, 2.361 m above LMSL). NMVD03 was affirmed as the official vertical datum in the National Spatial Reference System for the islands of Rota, Saipan and Tinian in the Commonwealth of the Northern Mariana Islands (CNMI) by Federal Register Notice (2009), replacing all previous height systems for this region. The official

defining document for that datum was published in 2009.
