Item class GeodeticCRS

NAD 83 (1986) - LatLon

Item statusVALIDIdentifier270

Alias NAD83 (1986)
Alias NAD83 (Original)

Information source Title Project REDEAM: Models for Historical Horizontal

Deformation

Author R.A. Snay, M.W. Cline, E.L. Timmerman

Publisher U.S. Dept. of Commerce, National Oceanic and

Atmospheric Administration, National Ocean Service, Charting and Geodetic Services,

Rockville, MD

Publication date 1987-09

Series/Journal name NOAA Technical Report Issue identification NOS 125 NGS 42

Information source Title NADCON 5.0: Geometric Transformation Tool for

points in the National Spatial Reference System

Author D. Smith, A. Bilich

Publisher NOAA's National Geodetic Survey

Publication date 2017-03-27 Edition date 2017-03-27

Series/Journal name NGS Technical Report

Other citation details Replaces version 4.2 and all earlier. Provides

gridding algorithm, datum transformations, and

extents of covnversion grids.

Information source Title The Evolution of NAD83 in Canada

Author M. Craymer

Publisher Canadian Institute of Geomatics

Publication date 2006 Series/Journal name Geomatica Issue identification Volume 60, No. 2

Publication date 1988

Series/Journal name Papers for the CISM Seminars on the NAD '83

Redefinition in Canada and the Impact on Users

Data source ISO Geodetic Registry

Remarks This CRS includes longitudes which are POSITIVE EAST. The

adjustment included connections to Greenland and Mexico but the system has not been adopted there. Except in Alaska, for applications with an accuracy of better than 1m replaced by NAD83(HARN).

Scope Spatial referencing

Datum North American Datum of 1983

Coordinate System Ellipsoidal 2D CS. Axes: latitude, longitude. Orientations: north, east.

UoM: degree

Extent

North America - onshore and offshore: Canada - Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nova Scotia, Nunavut,

Ontario, Prince Edward Island, Quebec, Saskatchewan, Yukon. Puerto Rico. United

States (USA) – Alaska, CONUS (Alabama, Arizona, Arkansas, California, Colorado,

Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky,

Louisiana, Maine, Maryland, Massachusetts,

Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire,

New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma,

Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West

Virginia, Wisconsin, Wyoming), Hawaii. Virgin Islands (British). Virgin Islands (US).

Geographic Bounding Box

Data source ISO Geodetic Registry

Remarks The 1986 adjustment includes connections to Greenland and Mexico

but the system has not been adopted there. A set of numerical

horizontal crustal motion models for California, Nevada, parts of Alaska and Hawaii were used to estimate horizontal velocities in order to convert geodetic observations from their original epoch to 1984.0. For other parts of the network, no datum realization epoch exists (datum is a mix of observations from different eras). Replaced NAD27 in Canada and U.S. Replaced by NAD 83 (HARN) in US and NAD83(CSRS96) v1

n Canada.

Anchor definition Original 1986 horizontal network adjustment. The origin, scale and

orientation of the frame are nominally defined to be that for the BIH Terrestrial System 1984 (BTS84) with origin at the approximate geocentre. NAD83 Doppler stations in the Doppler reference frame NWL 9D were brought into alignment with BTS84 using an

internationally adopted transformation.

Release date 1986

Scope Spatial referencing
