# **ISO Geodetic Registry**

Item class Transformation

Name WGS 84 (G1150) to WGS 84 (G1674) [KD v1]

Item statusVALIDIdentifier978

Information source Title Personal communication

Author N.W. Henschel

Publisher National Geospatial-Intelligence Agency

Publication date 2022-12-02

Information source Title Transforming between WGS84 Realizations

Author K.M. Kelly, M.L. Dennis

Publisher American Society of Civil Engineers

Publication date 2022

Series/Journal name Journal of Surveying Engineering

Issue identification 148(2)

Other citation details https://doi.org/10.1061/

(ASCE)SU.1943-5428.0000389 (accessed

2023-01-29)

Data source ISO Geodetic Registry

Remarks Transformation derived via ITRF2005 from Kelly & Dennis (2022),

Tables 5 & 6.

Operation version KD v1

Scope Spatial referencing and GPS satellite navigation

Operation accuracy 0.02 m

 Source CRS
 WGS 84 (G1150) - XYZ

 Target CRS
 WGS 84 (G1674) - XYZ

Operation method Time-Dependent Coordinate Frame Transformation (geocentric

Cartesian domain)

#### Extent

| Description         | World                    |        |  |
|---------------------|--------------------------|--------|--|
| Geographic Bounding | Box West-bound longitude | -180.0 |  |
|                     | North-bound latitude     | 90.0   |  |
|                     | East-bound longitude     | 180.0  |  |
|                     | South-bound latitude     | -90.0  |  |

### Operation parameter values

Rate of change of Z-axis rotation
Rate of change of scale difference
Time reference

0.0 milliarc-second per year-0.08 parts per billion per year2005.0 year

# **ISO Geodetic Registry**

Item class OperationMethod

Name Time-Dependent Coordinate Frame

**Transformation (geocentric Cartesian domain)** 

Item status VALID
Identifier 94

Alias Time-Dependent 7-Parameter Transformation

Alias 14-Parameter Transformation

Alias Time-Dependent Coordinate Frame Transformation

Data source ISO Geodetic Registry

Remarks Note the analogy with the Time-dependent Position Vector

Transformation but beware of the differences! The Position Vector

Transformation convention is used by IAG.

Formula Geomatics Guidance Note No 7, part 2: Coordinate Conversions and

Transformations including Formulas
