Remarks Replaces SIR09P01. Replaced by SIR11P01.

Anchor definition Realized by a frame of 183 continuously operating stations using

GPS observations from January 2000 to June 2010 and aligned to ITRF2008 at epoch 2005.0. GPS data from January 2000 to November 2006 reprocessed using the first reprocessing campaign products (IG1) of the International GNSS Service and absolute phase centre calibrations referring to the IGS05/IGb05 reference frame. Velocity model VEMOS2009 used to propagate coordinates from an arbitrary

epoch to the 2005.0 reference epoch.
