Remarks Grid transformation from ITRF2008 ellipsoidal heights at epoch 2010.0

to CGVD2013(CGG2013a) orthometric heights at epoch 2010.0 using the CGG2013a geoid model upon which CGVD2013(CGG2013a) is defined. Bi-linear interpolation of the grid file will give results agreeing

to within 1cm 99.97% of the time.

Operation version v1

Scope Spatial referencing

Operation accuracy 0.03 m

Remarks For consistency with earlier geoid models in Canada, reference

software for CGG2013 and CGG2013a uses bi-quadratic interpolation over nine grid nodes. The bi-linear interpolation is sufficient for most uses as the newer models have a higher spatial resolution. See

information source for file format documentation.
