ISO Geodetic Registry

GeodeticDatum Item class

Name **International Terrestrial Reference Frame 2005**

Item status Identifier 105 Alias

ITRF2005

Alias IERS Terrestrial Reference Frame 2005

Information source Title National Vertical Control Network - Notice of Final

Action

Author **US** Government

Publisher Office of Federal Register, NARA

Publication date 1976-05-14 Edition date 1976-05-17

Series/Journal name Federal Register Notice

Issue identification Volume 41, No. 96, Document 76-14245

Page 20202.0

Other citation details Formally adopted usage of NGVD 29 as datum

name

Title ITRF2005: A new release of the International Information source

> Terrestrial Reference Frame based on time series of station positions and Earth Orientation

Parameters

Author Z. Altamimi, X. Collilieux, J. Legrand, B. Garayt,

C. Boucher

Publisher American Geophysical Union

Publication date 2007-09-07

Edition date

Series/Journal name Journal of Geophysical Research

Issue identification Vol 112

Title ITRF2005 on line 2006-10-05 Information source

> Author **IERS** Publication date 2006-10-05

Edition date

Series/Journal name IERS Message

Issue identification 97.0

Data source ISO Geodetic Registry

Replaces ITRF2000. Replaced by ITRF2008. This is a purely Cartesian Remarks

reference frame with no ellipsoid defined. GRS80 is the ellipsoid

recommended by the IAG and IERS.

Anchor definition Realisation of the IERS Terrestrial Reference System (ITRS) at

> reference epoch 2000.0. Origin at geocentre, originally orientated to the BIH Terrestrial System at epoch 1984.0 then adjusted to ensure zero net rotation to earth's overall tectonic motion. Origin is defined such that there are null translation parameters at epoch 2000.0 and null translation rates between the ITRF2005 and the ILRS SLR time series. Scale is defined such that there are null scale factor at epoch 2000.0 and null scale rate between the ITRF2005 and IVS VLBI time series. Orientation is defined such that there are null rotation parameters at epoch 2000.0 and null rotation rates between the ITRF2005 and ITRF2000. Datum defined by a set of 3 dimensional Cartesian station

coordinates and velocities given by the citations.

Release date 2006-10-05 Coordinate Reference Epoch 2000.0

Scope Spatial referencing

GRS 1980 Ellipsoid Prime Meridian Greenwich

Extent

| Description | World. | |
|-------------------------|----------------------|--------|
| Geographic Bounding Box | West-bound longitude | -180.0 |
| | North-bound latitude | 90.0 |
| | East-bound longitude | 180.0 |
| | South-bound latitude | -90.0 |

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

 Semi-major axis
 6378137.0 m

 Inverse flattening
 298.257222101 m
