GeodeticCRS Item class

Name NAD 83 (2007) - LatLonEHt

Item status **VALID** Identifier 397

Alias North American Datum of 1983 (2007)

Information source Title NADCON 5.0: Geometric Transformation Tool for

points in the National Spatial Reference System

Author D. Smith, A. Bilich

Publisher NOAA's National Geodetic Survey

Publication date 2017-03-27 Edition date 2017-03-27

Series/Journal name NGS Technical Report

Other citation details Replaces version 4.2 and all earlier. Provides

gridding algorithm, datum transformations, and

extents of covnversion grids.

Information source Title Notice to Adopt Standard Method for Horizontal

Datum Transformation

Author **US Government**

Publisher Office of Federal Register, NARA

Publication date 1990-08-10 1990-08-10 Edition date

Series/Journal name Federal Register Notice

Issue identification Volume 55, No. 155, Document: 00-18809

Page 32681.0

Other citation details Mandates use of NADCON for official

transformations between datums

ISO Geodetic Registry Data source Scope Spatial referencing

North American Datum of 1983 (2007) Datum

Coordinate System Ellipsoidal 3D CS. Axes: latitude, longitude, ellipsoidal height. Orientations: north, east, up. UoM: degree, degree, metre.

Extent

Description **United States and Territories - onshore** and offshore: Puerto Rico. United States

(USA) - Alaska, CONUS (Alabama, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina,

North Dakota, Ohio, Oklahoma, Oregon,

Pennsylvania, Rhode Island, South Carolina,

South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming). Virgin Islands (US).

Geographic Bounding Box	West-bound longitude	167.65	
	North-bound latitude	74.71	
	East-bound longitude	-63.88	
	South-bound latitude	14.92	l

Remarks Reaplaces NAD83(HARN) or NAD83(FBN). Replaced by

NAD83(2011), NAD83(PA11) or NAD83(MA11).

Anchor definition This is a realization of NAD83. A nationwide adjustment of the passive

control network constrained to the NAD83 (CORS96) Epoch 2002 coordinates. The CORS coordinates remained in NAD83 (CORS96) Epoch 2002, while passive control were identified as being on NAD83 (2007). Hence, this datum is only for the passive control network. In Alaska, a different epoch was used (which epoch?). Southern California

epoch?

Scope Spatial referencing

Ellipsoid GRS 1980
Prime Meridian Greenwich
