SIRGAS Continuously Operating Network DGF08P01 Datum

Coordinate System Ellipsoidal 3D CS. Axes: latitude, longitude, ellipsoidal height. Orientations: north, east, up. UoM: degree, degree, metre.

Extent

Description South America - onshore and offshore. Central America - onshore and offshore. Mexico onshore and offshore.

Geographic Bounding Box	West-bound longitude	-122.19
	North-bound latitude	32.72
	East-bound longitude	-25.28
	South-bound latitude	-59.87

Data source ISO Geodetic Registry

Remarks Replaces DGF07P01. Replaced by SIR09P01.

Anchor definition Realized by a frame of 126 continuously operating stations using

GPS observations from December 2002 to March 2008 and aligned to IGS05 at epoch 2004.5. GPS data from December 2002 to November 2006 reprocessed using the first reprocessing campaign products (IG1) of the International GNSS Service and absolute phase centre calibrations referring to the IGS05/IGb05 reference frame. Velocity model VEMOS2003 used to propagate coordinates from an arbitrary

epoch to the 2004.5 reference epoch.

Release date 2008 Coordinate Reference Epoch 2004.5 Scope Spatial referencing

Ellipsoid GRS 1980
Prime Meridian Greenwich

Extent

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

 Semi-major axis
 6378137.0 m
