Remarks Reaplaces NAD83(HARN) or NAD83(FBN). Replaced by

NAD83(2011), NAD83(PA11) or NAD83(MA11).

Anchor definition This is a realization of NAD83. A nationwide adjustment of the passive

control network constrained to the NAD83 (CORS96) Epoch 2002 coordinates. The CORS coordinates remained in NAD83 (CORS96) Epoch 2002, while passive control were identified as being on NAD83 (2007). Hence, this datum is only for the passive control network. In Alaska, a different epoch was used (which epoch?). Southern California

epoch?
