ISO Geodetic Registry

Item class Transformation

Name ITRF89 to ITRF90 [IERS v1]

Item statusVALIDIdentifier673

Information source Title IERS Conventions (2010)

Author G. Petit, B.J. Luzum (eds)

Publisher Verlag des Bundesamts fur Kartographie und

Geodasie

Publication date 2010

Edition date

Series/Journal name IERS Technical Notes

Issue identification 36.0

Other citation details ISSN: 1019-4568

Information source Title Memo: Specifications for reference frame fixing

in the analysis of a EUREF GPS campaign

(version 8)

Author C. Boucher, Z. Altamimi

Publisher Institute National de l'Information Geographique

et Forestiere (IGN), Laboratoire de Recherche en

Geodesie (LAREG)

Publication date 2011-05-18

Edition date

Information source Title ITRF 90 and other realizations of the IERS

Terrestrial Reference System for 1990

Author C. Boucher, Z. Altamimi

Publisher Central Bureau of IERS - Observatoire de Paris,

61 avenue de l'Observatoire, 75014 Paris, France

Publication date 1991-12-01

Edition date

Series/Journal name IERS Technical Notes

Issue identification 9.0 ISO Geodetic Registry

Remarks No rates of change were estimated for the transformation parameters.

Operation version IERS v1

Scope Spatial referencing

Operation accuracy 0.01 m

Source CRS ITRF89 - XYZ
Target CRS ITRF90 - XYZ

Operation method Position Vector Transformation (geocentric Cartesian domain)

Extent

Data source

Description	World.	
Geographic Bounding Box	West-bound longitude	-180.0
	North-bound latitude	90.0
	East-bound longitude	180.0
	South-bound latitude	-90.0

Operation parameter values

X-axis translation	-0.5 centimetre	
Y-axis translation	-2.4 centimetre	

Z-axis translation	3.8 centimetre
X-axis rotation	0.0 milliarc-second
Y-axis rotation	0.0 milliarc-second
Z-axis rotation	0.0 milliarc-second
Scale difference	-3.4 parts per billion

ISO Geodetic Registry

Item class OperationMethod

Name Position Vector Transformation (geocentric

Cartesian domain)

Item statusVALIDIdentifier88

Alias 7-Parameter Transformation

Alias Bursa-Wolf Transformation

Alias Position Vector Transformation

Alias Helmert Transformation

Data source ISO Geodetic Registry

Remarks This method is a specific case of the Molodensky-Badekas (PV)

method in which the evaluation point is the geocentre with coordinate

values of zero. Note the analogy with the Coordinate Frame

Transformation method but beware of the differences!
