Item class GeodeticCRS

NAD 83 (PA11) Epoch 2010 - XYZ

Item statusVALIDIdentifier449

Alias NAD83(PA11)

Alias North American Datum of 1983 (PA11)

Information source Title Introducing HTDP 3.1 to transform coordinates

across time and spatial reference frames

Author C. Pearson, R.A. Snay
Publisher Springer-Verlag
Publication date 2013-01-01
Edition date 2013-01-01
Series/Journal name GPS Solutions
Issue identification Volume 17, No. 1

Page 1-15

Other citation details NAD83 (2011), NAD83 (MA11), NAD83 (PA11)

transformation from IGb08

Information source Title Publication of North American Datum of 1983

(2011) Epoch 2010.00, North American Datum of 1983 (PA2011) Epoch 2010.00 and North American Datum of 1983 (MA2011) Epoch

Author US Government

Publisher Office of Federal Register, NARA

Publication date 2013-08-08 Edition date 2013-08-08

Series/Journal name Federal Register Notice

Issue identification Volume 78, No. 153, Document: 2013–19167,

Citation: 78 FR 48421

Page 48421-48422

Data source ISO Geodetic Registry
Scope Spatial referencing

Datum North American Datum of 1983 (PA11) Epoch 2010

Coordinate System Geocentric 3D right-handed Cartesian CS. Axes: Geocentric X,Y,Z.

Orientation: Z to North Pole, [X and Y in the equatorial plane, X at Prime Meridian | X in the equatorial plane at the Prime Meridian]. UoM:

m.

Extent

Description	American Samoa - onshore and offshore. Marshall Islands - onshore and offshore. United States (USA) - onshore and offshore - Hawaii. United States Minor Outlying Islands - onshore	
	and offshore.	
Geographic Bounding Box	West-bound longitude	157.47
	North-bound latitude	31.8
	East-bound longitude	-151.27
	South-bound latitude	-17.56

Series/Journal name NGS Technical Report

Other citation details Replaces version 4.2 and all earlier. Provides

gridding algorithm, datum transformations, and

extents of covnversion grids.

Data source ISO Geodetic Registry

Remarks Replaces NAD83(PACP00) for control determined in an active

reference frame for Hawaii, American Samoa and outlying U.S.

islands. For passive control, NAD83 (PA11) replaces NAD83 (FBN) for

American Samoa and NAD83 (HARN) for Hawaii.

Anchor definition Realization of NAD83. The frame is defined by a seven parameter

> transformation of ITRF2008 3D geocentric Cartesian coordinates and velocities for Hawaii, American Samoa and other Pacific islands at reference epoch 2010.0. The frame is kept aligned to the Pacific

Retrieved: 1970-01-01T00:00:00+00:00 // Last Registry change: 2024-02-27T05:15Z

tectonic plate using an Euler pole rotation. The origin, scale and orientation of the frame are nominally defined to be that for the BIH Terrestrial System 1984 (BTS84). This also is a realization of passive control constrained to the values at the CORS. NAD83(20110 serves as a connection between passive network transformed by grids and

active frames defined by time-dependent transformations.
