Remarks	The distinction in usage between ETRF89 and ETRS89 is confused: although in principle conceptually different in practice both are used as synonyms.
Scope	Spatial referencing
Datum	European Terrestrial Reference Frame 1989
Coordinate System	Ellipsoidal 3D CS. Axes: latitude, longitude, ellipsoidal height. Orientations: north, east, up. UoM: degree, degree, metre.

Remarks ETRS89 is the reference system and ETRF89 is its first realization.

Unfortunately the two terms have been used synonymously, which has caused some confusion amongst users. The reference frame should be referred to as ETRF89 to distinguish it from other realizations of

ETRS89.

Anchor definition Coincides with ITRF89 at epoch 1989.0 and is fixed to the stable part

of the Eurasian tectonic plate through 3 rotation rates derived from the AM02 geophysical model, representing the Eurasian plate's angular

velocity about its Euler pole.
