Remarks Adopted by the Canadian federal government for Canada, and by the

provincial governments in Alberta and Prince Edward Island. Replaces

NAD83(CSRS) v6.

Anchor definition Realization of the North American Datum of 1983 for the Canadian

Spatial Reference System, referred to as CSRS98 or CSRS. The frame is defined by a time-dependent seven parameter transformation of ITRF2014 3D geocentric Cartesian coordinates and velocities for

Canadian and bordering US and Greenland areas at reference epoch 2010.0. The frame is kept aligned to North America at other epochs using the NNR-NUVEL-1A estimate of three Cartesian rotation rates of change representing the tectonic plate motion of North America. The origin, scale and orientation of the frame are nominally defined to be

that for the BIH Terrestrial System 1984 (BTS84).

Release date 2017-05-01
Coordinate Reference Epoch 2010.0

Scope Spatial referencing

Ellipsoid GRS 1980
