Remarks Replaces DGF08P01. Replaced by SIR10P01.

Anchor definition Realized by a frame of 128 continuously operating stations using

GPS observations from January 2000 to January 2009 and aligned to IGS05 at epoch 2005.0. GPS data from January 2000 to November

2006 reprocessed using the first reprocessing campaign products (IG1) of the International GNSS Service and absolute phase centre calibrations referring to the IGS05/IGb05 reference frame. Velocity model VEMOS2009 used to propagate coordinates from an arbitrary

epoch to the 2005.0 reference epoch.

Release date 2009
Coordinate Reference Epoch 2005.0

Scope Spatial referencing

Ellipsoid GRS 1980
Prime Meridian Greenwich

Extent

Description	South America - onshore and offshore. Central America - onshore and offshore. Mexico - onshore and offshore.

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

 Semi-major axis
 6378137.0 m

 Inverse flattening
 298.257222101 m
