Remarks Replaces Korean 1985 Datum.

Anchor definition KGD2002 is a GRS80-based geodetic reference frame aligned to

ITRF2000 at epoch 2002.0. The origin of the datum was recalculated based on the VLBI observations from 1995 to 2002. The datum is realized through 60 CORS and a network of about 20,000 control

points.
