Data source ISO Geodetic Registry

Remarks Normal heights. Australian Vertical Working Surface originally realized

by the Australian Gravimetric Quasi-Geoid model AGQG\_20191107, which was found to be biased and replaced by AGQG\_20201120. AVWS is a gravimetric datum realized by the Australian Gravimetric

Anchor definition AVWS is a gravimetric datum realized by the Australian Gravimetric

Quasigeoid (AGQG) and referenced to the GDA2020 reference frame.

Release date 2020-01-01

Scope Spatial referencing

## Extent

| Description             | Australia including Lord Howe Island,<br>Macquarie Island, Ashmore and Cartier Islands,<br>Christmas Island, Cocos (Keeling) Islands,<br>Norfolk Island. All onshore and offshore. |        |
|-------------------------|--|--------|
| Geographic Bounding Box | West-bound longitude   | 93.41  |
|                         | North-bound latitude   | -8.47  |
|                         | East-bound longitude   | 173.34 |
|                         | South-bound latitude   | -60.56 |
