ISO Geodetic Registry Data source

Replaces SIR14P01. Replaced by SIR17P01. Remarks

Anchor definition Realized by a frame of 303 continuously operating stations using

> GPS and GLONASS observations from March 2010 to April 2015 and aligned to IGb08 at epoch 2013.0. Weekly normal equations from March 2010 to April 2011 were reprocessed using the second reprocessing campaign products (IG2) of the International GNSS Service and absolute phase centre calibrations referring to the IGS08 reference frame. Velocity model VEMOS2015 used to propagate

coordinates from an arbitrary epoch to the 2013.0 reference epoch.

Release date 2016 Coordinate Reference Epoch 2013.0

Scope Spatial referencing

Ellipsoid **GRS 1980** Greenwich Prime Meridian

Extent

Description	South America - onshore and offshore. Cer America - onshore and offshore. Mexico - onshore and offshore.
