Heidelberg

Data source ISO Geodetic Registry
Scope Spatial referencing

Datum SIRGAS Continuously Operating Network SIR14P01

Coordinate System Ellipsoidal 3D CS. Axes: latitude, longitude, ellipsoidal height. Orientations: north, east, up. UoM: degree, degree, metre.

Extent

South America - onshore and offshore. Central America - onshore and offshore. Mexico - onshore and offshore.

Geographic Bounding Box

West-bound longitude
North-bound latitude

South America - onshore and offshore. Mexico - onshore and offshore.

-122.19

East-bound longitude -25.28

Remarks Replaces SIR13P01. Replaced by SIR15P01.

Anchor definition Realized by a frame of 242 continuously operating stations using GPS

and GLONASS observations from April 2010 to July 2014 and aligned to IGb08 at epoch 2013.0. Weekly normal equations from April 2010 to April 2011 were reprocessed using the second reprocessing campaign products (IG2) of the International GNSS Service and absolute phase centre calibrations referring to the IGS08 reference frame. Velocity model VEMOS2009 used to propagate coordinates from an arbitrary

epoch to the 2013.0 reference epoch.

Release date 2014
Coordinate Reference Epoch 2013.0

Scope Spatial referencing

Ellipsoid GRS 1980

Extent

Description	South America - onshore and offshore. Central America - onshore and offshore. Mexico - onshore and offshore.

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

Semi-major axis 6378137.0 m Inverse flattening 298.257222101 m

Remarks Used in geographic 3D coordinate reference systems. Horizontal

coordinates referenced to this CS are in degrees. Any degree

representation (e.g. DMSH, decimal, etc.) may be used but that used

must be declared for the user.
