Scope	Spatial referencing			
•	•			
Datum	North American Datum of 1983 (PACP00)			
Coordinate System	Ellipsoidal 2D CS. Axes: latitude, longitude. Orientations: north, east.			

Extent

American Samoa - onshore and offshore.

Marshall Islands - onshore and offshore. United
States (USA) - onshore and offshore - Hawaii.

United States Minor Outlying Islands - onshore and offshore.

UoM: degree

Geographic Bounding Box	West-bound longitude	157.47	
	North-bound latitude	31.8	
	East-bound longitude	-151.27	
	South-bound latitude	-17.56	

Item class GeodeticDatum

North American Datum of 1983 (PACP00)

Item status VALID Identifier 113

Alias NAD83 (PACP00)

Remarks Replaces NAD83 (HARN). Replaced by NAD83(PA11) from

2011-09-06.

Anchor definition Realization of the NAD83. The frame is defined by a time-dependent

seven parameter transformation of ITRF2000 3D geocentric Cartesian coordinates and velocities at reference epoch 1993.62. The frame is kept aligned to the Pacific plate at other epochs based on an Euler pole calculated from 16 sites located on the North American, Mariana, and Pacific plates. The original web listing erroneously showed values for this frame as being identical to NAD83 (CORS96) Epoch 2002. However, the original HTDP (version 2.7) implementation used the

transformation given in the reference.

Release date 2003
Coordinate Reference Epoch 1993.6

Scope Spatial referencing

Ellipsoid GRS 1980

Prime Meridian Greenwich

Extent

Description	American Samoa - onshore and offshore. Marshall Islands - onshore and offshore. United States (USA) - onshore and offshore - Hawaii. United States Minor Outlying Islands - onshore	
 Geographic Bounding Box	and offshore. West-bound longitude	157.47

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

Semi-major axis 6378137.0 m
Inverse flattening 298.257222101 m
