Item class GeodeticCRS

Name ITRF2005 - LatLonEHt

Item statusVALIDIdentifier209

Alias International Terrestrial Reference Frame 2005

Alias IERS Terrestrial Reference Frame 2005

Information source Title ITRF2005 on line 2006-10-05

Author IERS Publication date 2006-10-05

Edition date

Series/Journal name IERS Message

Issue identification 97.0

Information source Title ITRF2005: A new release of the International

Terrestrial Reference Frame based on time series of station positions and Earth Orientation

Parameters

Author Z. Altamimi, X. Collilieux, J. Legrand, B. Garayt,

C. Boucher

Publisher American Geophysical Union

Publication date 2007-09-07

Edition date

Series/Journal name Journal of Geophysical Research

Issue identification Vol 112

Data source ISO Geodetic Registry

Remarks Replaces ITRF2000 - LatLonEHt. Replaced by ITRF2008 - LatLonEHt.

Scope Spatial referencing

Datum International Terrestrial Reference Frame 2005

Coordinate System Ellipsoidal 3D CS. Axes: latitude, longitude, ellipsoidal height.

Orientations: north, east, up. UoM: degree, degree, metre.

Extent

Description	World.	
Geographic Bounding Box	West-bound longitude	-180.0
	North-bound latitude	90.0
	East-bound longitude	180.0
	South-bound latitude	-90.0

Item class GeodeticDatum

Name International Terrestrial Reference Frame 2005

Remarks Replaces ITRF2000. Replaced by ITRF2008. This is a purely Cartesian

reference frame with no ellipsoid defined. GRS80 is the ellipsoid

recommended by the IAG and IERS.

Anchor definition Realisation of the IERS Terrestrial Reference System (ITRS) at

reference epoch 2000.0. Origin at geocentre, originally orientated to the BIH Terrestrial System at epoch 1984.0 then adjusted to ensure zero net rotation to earth's overall tectonic motion. Origin is defined such that there are null translation parameters at epoch 2000.0 and null translation rates between the ITRF2005 and the ILRS SLR time series. Scale is defined such that there are null scale factor at epoch 2000.0 and null scale rate between the ITRF2005 and IVS VLBI time series. Orientation is defined such that there are null rotation parameters at epoch 2000.0 and null rotation rates between the ITRF2005 and ITRF2000. Datum defined by a set of 3 dimensional Cartesian station

coordinates and velocities given by the citations.

Release date 2006-10-05
Coordinate Reference Epoch 2000.0

Scope Spatial referencing

Ellipsoid GRS 1980
Prime Meridian Greenwich

Remarks Adopted by IUGG 1979 Canberra. Inverse flattening is derived from

geocentric gravitational constant GM = 3986005e8 m*m*m/s/s, dynamic form factor J2 = 108263e-8 and Earth's angular velocity =

7292115e-11 rad/s.

 Semi-major axis
 6378137.0 m

 Inverse flattening
 298.257222101 m

Remarks Used in geographic 3D coordinate reference systems. Horizontal

coordinates referenced to this CS are in degrees. Any degree representation (e.g. DMSH, decimal, etc.) may be used but that used

must be declared for the user.
