Scope Spatial referencing

Datum North American Datum of 1983 (CSRS) version 4

Coordinate System Geocentric 3D right-handed Cartesian CS. Axes: Geocentric X,Y,Z.

Orientation: Z to North Pole, [X and Y in the equatorial plane, X at Prime Meridian | X in the equatorial plane at the Prime Meridian]. UoM:

m.

Extent

Dagarintian

Description	Canada - onshore and offshore - Alberta, British Columbia, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nova Scotia, Nunavut, Ontario, Prince Edward Island, Quebec, Saskatchewan,			
			Yukon.	
			Geographic Bounding Box	West-bound longitude
	North-bound latitude	90.0		
East-bound longitude	-47.74			
South-bound latitude	40.04

Remarks Adopted by the Canadian federal government for Canada, and by

provincial governments in Alberta and British Columbia. Replaces

NAD83(CSRS) v3. Replaced by NAD83(CSRS) v5.

Anchor definition Realization of the North American Datum of 1983 for the Canadian

Spatial Reference System, referred to as CSRS98 or CSRS. The frame is defined by a time-dependent seven parameter transformation of ITRF2000 3D geocentric Cartesian coordinates and velocities for Canadian and bordering US and Greenland stations at reference epoch 2002.0. The frame is kept aligned to North America at other epochs using the NNR-NUVEL-1A estimate of three Cartesian rotation rates of change representing the tectonic plate motion of North America. The origin, scale and orientation of the frame are nominally defined to be

that for the BIH Terrestrial System 1984 (BTS84).

Release date 2002-01-01

Scope Spatial referencing

Ellipsoid GRS 1980

Extent

Newfoundland and La Territories, Nova Sco		anitoba, New Brunswick, Labrador, Northwest otia, Nunavut, Ontario, d, Quebec, Saskatchewan,
