Remarks Null transformation. IGS00 and IGb00 are both aligned to ITRF2000

and are treated as the same reference frame. Although the actual IGS00-IGb00 transformation parameters are not null, they are

statistically insignificant and treated as null by the IGS.

Remarks Note the analogy with the rotation for the Time-dependent Coordinate

Frame Transformation but beware of the differences! The Position

Vector Transformation convention is used by IAG.
