Remarks The ETRF96 reference frame is a realisation of the ETRS89 reference

Coincides with ITRF96 in orientation and scale at epoch 1989.0 Anchor definition

realigned to ITRF89 at epoch 1989.0 using 3 translations and is fixed to the stable part of the Eurasian tectonic plate through 3 rotation rates derived from the NNR-NUVEL-1A geophysical model, representing the

Eurasian plate's angular velocity about its Euler pole.
