Remarks The ETRF2000 reference frame is a realization of the ETRS89

reference system. The EUREF Technical Working Group (TWG) recommends to adopt ETRF2000 as the conventional frame of the

ETRS89 system.

Anchor definition Coincides with ITRF2000 in orientation and scale at epoch 1989.0

realigned to ITRF89 at epoch 1989.0 using 3 translations and is fixed to the stable part of the Eurasian tectonic plate through 3 rotation rates derived from the ITRF2000 velocity field, representing the Eurasian

plate's angular velocity about its Euler pole.

Coordinate Reference Epoch 1989.0

Scope Spatial referencing

Ellipsoid GRS 1980
Prime Meridian Greenwich
